

**The numerous advantages of UNIPROMET 1 and 2 vineyard posts compared to wooden posts are:**

- Easy to mount in the ground, in orcharding
- Special shape and strenght of hooks, placed parallel, on both sides of the posts, which enables easy wire placement, and possibility to change the wire without any special equipment
- Shape of the hooks provides longitudinal movement of the wire, and prevents its accidental fallout
- Posts are hot dip galvanized according to standard DIN EN ISO 1461, with zink coating thickness of 50-70µm, and therefore protected from corrosion in all weather conditions, which guarantees durability and high endurance
- They are suitable for vineyards where grape is harvested manually or by machines
- Post lenght can be adjusted to Your needs, and they are especially suitable for hydraulic installation

***No diseases caused by dry rot  
Harmless and recyclable  
Easy to handle, top quality, longevity***

***We set high standards  
Stability as a gift....***

POSTS**

*STABILITY AS A GIFT...*

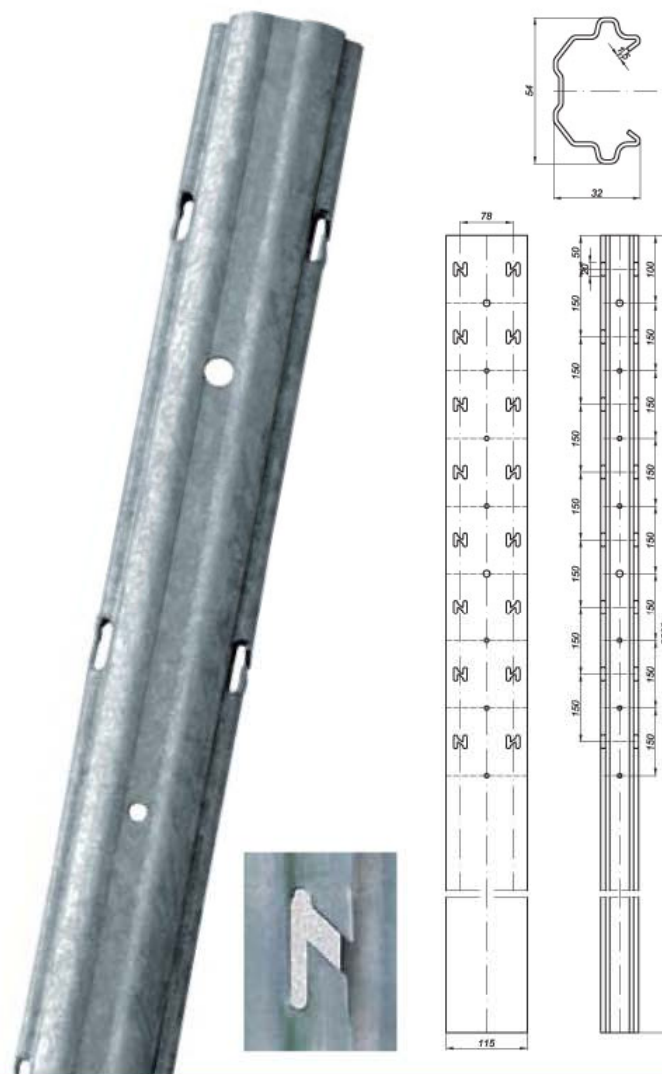

**UNIPROMET**

# “UNIPROMET 1”

Material	Hot dip galvanized HRC	Thickness mm	Height mm	Weight kg
Outer dimensions:	56 x 34 mm	1,5 - 2	2400	3,48 - 4,64
Vertical distance between hooks:	100 mm	1,5 - 2	2500	3,62 - 4,83
Max distance between posts:	8 m	1,5 - 2	2600	3,76 - 5,02

# “UNIPROMET 2”

Material	Hot dip galvanized HRC	Thickness mm	Height mm	Weight kg
Outer dimensions:	56 x 32 mm	1,5 - 2	2400	3,48 - 4,64
Vertical distance between hooks:	150 mm	1,5 - 2	2500	3,62 - 4,83
Max distance between posts:	8 m	1,5 - 2	2600	3,76 - 5,02

- If "The truth is in wine", then the grapewine is supported by really good posts.
- Unique, hot dip galvanized, easy to mount on every ground, no matter where Your vineyard is – in the plain or on the hill, with beauty and grace of grapewine, will make Your vineyard sunnier.
- To increase grapewine yield, for good development of roots and vine, for healthier vineyard.

### Recommended post height

	Vine height	mm
Frontal post	>600 mm	2500-2600
	<600 mm	min 2400
Inner post	>600 mm	2300-2400
	<600 mm	min 2200

### Recommended length of the post in the ground

	Depth mm	Height above the ground
Frontal post	1/3 of Length	1600 mm
Inner post	1/4 of Length	1600 mm
